In response to the items mentioned in the Notice of Allowability, we now submit a formal copy of Fig 16.

We also submit a revised version of Fig 11. This shows the water inlet pipe 127 now located above the water level in the inlet chamber 124.

In a telecon 08 March 2004, the examiner indicated that this change would be acceptable. The change corrects an error, in that it is unacceptable in many jurisdictions for the water inlet pipe to be below the level of the water in the inlet chamber.

Submitted by,

Anthony Asquith  
(Regn 32373)  
Agent for the Applicant
